Education

UNIVERSITY OF CALIFORNIA

SAN FRANCISCO, CA

Master of Science in Biomedical Imaging

August 2025-August 2026

- **Selected Coursework:** • Biomed 201: Principles of MR Imaging • Biomed 202: Physical Principles of CT, PET and SPECT Imaging • Biomed 260 and 265: Image Processing Techniques • Biomed 245: Machine Learning for Biomedical Imaging

UNIVERSITY OF MICHIGAN

ANN ARBOR, MI

Bachelor of Science in Physics and Mathematics, 3.3 GPA

September 2017-May 2022

- **Selected Coursework:** • Math 404: Intermediate Differential Equations • Math 454: Boundary Value Problems in Partial Differential Equations • Physics 411: Computational Physics

AMERICAN RED CROSS

Basic Life Support Certification

April 2025

Experience

University of Michigan

Ann Arbor, MI

Course Coordinator

June 2023 to present

- Maintained a large database of course materials, using the Microsoft suite (Excel, Word) and Google suite (Sheets, Docs, Slides). Processed and analyzed data in preparation for an upcoming paper I have authored.
- Updated the main course website weekly, maintained other course pages and data such as Canvas, Gradescope, Piazza, and PrairieLearn, sent course announcements, and processed and posted grades.
- Handled requests for extensions, regrades, accommodations, and excused absences for a course of approximately 800 students. Processed regrades and worked with students to build plans for completing work
- Maintained the staff office and coordinated communications with building management, handled reimbursements and course registration add/drop overrides.
- Coordinated between multiple departments and institutions to facilitate the formation of a persistent computer-based testing facility for College of Engineering use.

Research Assistant

May 2019 – May 2022

- Investigated techniques of star-galaxy separation under the supervision of Dr. Eric Bell.
- Developed a two-point galaxy autocorrelation function in order to better characterize substructure of background galaxies.
- Used Python to analyze large datasets, working with tools such as NumPy, Astropy, and matplotlib.
- Communicated results and visualizations in group meetings.

Exam Proctor and Student Ambassador

September 2021 – December 2021, April 2022

- Assisted in the delivery of midterm exams for the course Physics 150
- Answered clarifying questions and checked for academic honesty during the exam period.
- Met with high school students interested in pursuing physics. Discussed and provided resources related to research and career exploration within physics.
- Led a tour of the physics department, including the research and advanced labs.

Inter-Cooperative Council

Ann Arbor, MI

President, Ruths' Cooperative House

May 2024-Present

- Maintained a base of housing resources and connected people to information about securing housing as well as assisting them through the process. Assisted people in obtaining housing at the house I maintained as well as switches to and from other houses. Advocated for residents during these processes.
- Managed a cooperative house of 12, made chore schedules, oversaw the house's financial decisions and purchases, and worked with the central housing department to facilitate smooth transfers of contracts. Attended a number of leadership trainings regarding house management and how to better assist and serve residents.
- Volunteered time for member assistance hours to maintain the central office as well as worked on improvement projects at other houses within the cooperative system.

Technical Skills

Languages: Python, MATLAB, C++, Java, HTML.

Developer Tools: Github, Docker, WSL, VScode

Imaging Software: HOROS, AMIDE, ImageJ, SIVIC, CONN
